Opening Keynote Address:

<i>Participation in community health care programs: Are we ready to move beyond rhetoric to consider methods and the politics of the possible?</i>	1
Mark Nichter, University of Arizona, Tucson, AZ USA	

Paper Session I: Community-Based Design

<i>Community designers</i>	3
Vicki L. O'Day, Xerox Palo Alto Research Center, Palo Alto, CA USA	
Daniel G. Bobrow, Xerox Palo Alto Research Center, Palo Alto, CA USA	
Billie Hughes, Phoenix College, Phoenix, AZ USA	
Kimberly Bobrow, Xerox Palo Alto Research Center, Palo Alto, CA USA	
Vijay Saraswat, Xerox Palo Alto Research Center, Palo Alto, CA USA	
Jo Talazus, Longview Elementary School, Phoenix, AZ USA	
Jim Walters, Phoenix College, Phoenix, AZ USA	
Cynde Welbes, Longview Elementary School, Phoenix, AZ USA	
<i>Community-based participatory design in the third world</i>	15
Jørn Braa, Norwegian Computing Center, Oslo, Norway	
<i>Community participation in health informatics in Africa: An experiment in tripartite partnership in Ile-Ife, Nigeria</i>	25
Mikko Korpeła, University of Kuopio, Kuopio Finland	
H.A. Soriyan, Obafemi Awolowo University, Ile-Ife, Osun State, Nigeria	
K.C. Olufokunbi, Obafemi Awolowo University, Ile-Ife, Osun State, Nigeria	
A.A. Onayade, Eleyele Comprehensive Health Centre, Ile-Ife, Osun State, Nigeria	
Anita Davies-Adetugbo, Obafemi Awolowo University, Ile-Ife, Osun State, Nigeria	
Duro Adesanmi, Iremo District Health Committee, Ile-Ife, Osun State, Nigeria	

Paper Session II: Participatory Design in Small Organizations

<i>Participatory design and participative practices in small companies</i>	35
Toni Robertson, University of Technology, Sydney, Australia	
<i>CAVEAT exemplar: Participatory design in a non-profit volunteer organisation</i>	45
Brenda McPhail, University of Toronto, Toronto, Ontario, Canada	
Terry Costantino, University of Toronto, Toronto, Ontario, Canada	

David Bruckmann, University of Toronto, Toronto, Ontario, Canada
Ross Barclay, University of Toronto, Toronto, Ontario, Canada
Andrew Clement, University of Toronto, Toronto, Ontario, Canada

When survival is an issue: PD in support of landscape architecture55
Preben Holst Mogensen, Lancaster University, Lancaster, UK
Dan Shapiro, Lancaster University, Lancaster, UK

Special Session:

Economic and Political Contexts for Participatory Design

Beyond participatory design.....63
Joan Greenbaum, City University of New York, Long Island City, NY USA
Richard Sclove, The Loka Institute, Amherst, MA USA

Post modern times: Participation beyond the workplace65
Joan Greenbaum, City University of New York, Long Island City, NY USA

Paper Session III:

Diverse Roles for Participatory Designers

Participatory design in consulting.....73
Johannes Gärtner, Vienna Technical University, Vienna, Austria

Partial success and partial failure in a commercial development project.....81
Duncan Sanderson, University of Brighton, Brighton, UK

The Festival checklist: Design as the transformation of artefacts.....93
Olav W. Bertelsen, Aarhus University, Aarhus, Denmark

Paper Session IV:

Arenas for Worker Participation

Achieving worker participation in technological change: The case of the flashing cursor..... 103
Patsy Segall, Union Research Centre on Organisation and Technology,
Melbourne, Australia
Leigh Snelling, Union Research Centre on Organisation and Technology,
Melbourne, Australia

Participatory design: Examples and institutional needs..... 111
Frank Emspak, University of Wisconsin Extension, Madison, WI USA

P for political? Some challenges to PD towards 2000..... 117
Eevi E. Beck, University of Oslo, Oslo, Norway

Panel Session I:

Where is the Patient in Patient-Centered User-Oriented Design in Health Care Systems Development?..... 127

Moderator and Organizer: Judith Gregory, University of California-San Diego
& Kaiser Permanente Southern California Region, Pasadena, CA USA

Organizer: Barbara Katzenberg, Ellora Software, Inc. & Stanford University
 School of Education, Lexington, MA USA
 Diana Forsythe, University of California, San Francisco, CA USA
 Richard M. Frankel, University of Rochester & Highland Hospital, Sweden
 Nancy Lelieure, Ellora Software, Inc., USA
 Toomas Timpka, Linköping University Hospital, Sweden

**Paper Session V:
 Methods, Techniques, and Tools I**

MUST - a method for participatory design 129
 Finn Kensing, Roskilde University, Roskilde, Denmark
 Jesper Simonsen, Roskilde University, Roskilde, Denmark
 Keld Bødker, Roskilde University, Roskilde, Denmark

The Envisionment workshop - from visions to practice..... 141
 Pelle Ehn, Lund University, Lund, Sweden
 Bengt Brattgård, Lund University, Lund, Sweden
 Roy C. Davies, Lund University, Lund, Sweden
 Elisabeth Dalholm, Lund University, Lund, Sweden
 Ann Hägerfors, Lund University, Lund, Sweden
 Birgitta Mitchell, Lund University, Lund, Sweden
 Jörn Nilsson, Lund University, Lund, Sweden

Techniques and tools for continuous user participation..... 153
 Carola Lilienthal, University of Hamburg, Hamburg, Germany
 Heinz Züllighoven, University of Hamburg, Hamburg, Germany

**Panel Session II:
 The Participatory Design of Work Space** 161

Organizer: Steve Harrison, Xerox PARC, Palo Alto, CA USA
 Turid Horgen, MIT, Cambridge, MA USA
 Joe Ouye, Facility Technics, Oakland, CA USA
 Rick Robinson, E-Lab, Chicago, IL USA

**Paper Session VI:
 Methods, Techniques, and Tools II**

Influencing qualities of information systems — future challenges for participatory design 163
 Kristin Braa, University of Oslo, Oslo, Norway

Developing groupware with evolution and participation, a case study 173
 Helge Kahler, University of Bonn, Bonn, Germany

PictureCARD: A storytelling tool for task analysis 183
 Michael Tschudy, Apple Computer, Inc., Cupertino, CA USA
 Elizabeth Dykstra-Erickson, Apple Computer, Inc., Cupertino, CA USA
 Matthew Holloway, Netscape Communications, Inc., Mountain View, CA USA

Panel Session III:

Labor Unions and Technological Design: Entry Points for Change..... 193

Organizer: Todd Cherkasky, Work & Technology Institute, Washington, DC USA
Nicholas Ashford, MIT, Cambridge, MA USA
Ray Scannell, Bakery, Confectionery, and Tobacco Workers International Union, Kensington, MD USA
Harold Salzman, Jobs for the Future, Boston, MA USA
Joel Yudken, Work & Technology Institute, Washington, DC USA

Workshops:

Communicating quality..... 195

Pelle Ehn, Lund University, Lund, Sweden
Theis Meggerle, Lund University, Lund, Sweden
Odd Steen, Lund University, Lund, Sweden
Michael Svedemar, Lund University, Lund, Sweden

An in-depth look at a participatory design method: Projective expression through mage collages..... 197

Elizabeth B.-N. Sanders, Fitch Inc., Worthington, OH USA
Markie Davidson, Fitch Inc., Worthington, OH USA

Unemployment by design: Participatory design and the changing structure of the workforce in the information society..... 199

Peter van den Besselaar, University of Amsterdam, Amsterdam, Netherlands
Joan Greenbaum, City University of New York, New York, NY USA
Peter Mambrey, GMD-German National Center for Information Technology, St. Augustin, Germany

Participatory design of open organizations 201

Karen Holtzblatt, InContext Enterprises, Inc., Harvard, MA USA
Hugh Beyer, InContext Enterprises, Inc., Harvard, MA USA

How can participatory design practice be taught?..... 203

Bo Helgeson, University of Karlskrona/Ronneby, Ronneby, Sweden
Sara Eriksén, University of Karlskrona/Ronneby, Ronneby, Sweden
Berthel Sutter, University of Karlskrona/Ronneby, Ronneby, Sweden

The politics of knowledge: Participatory design and the location of expertise..... 205

Julian E. Orr, Xerox PARC, Palo Alto, CA USA
Norman C. Crowfoot, Xerox Corporation, East Rochester, NY USA

Keynote Address:

Power and design: Why unions and organization matter..... 207

Elaine Bernard, Harvard University, Cambridge, MA USA

**Paper Session VII:
Supporting Users in Design**

Participating informally: Opportunities and dilemmas in user-driven design 209
Martin Beirne, University of Glasgow, Glasgow, UK
Harvie Ramsay, University of Strathclyde, Glasgow, UK
Androniki Panteli, University of Glasgow, UK

Using participatory design of user documentation in support of learning at work.... 219
Trudy Williams, NYNEX, White Plains, NY USA

Initiative in participatory design..... 223
Kim Halskov Madsen, Aarhus University, Århus, Denmark

**Paper Session VIII:
Designing Large Scale, Distributed Technologies**

Making infrastructure: The dream of a common language 231
Laura J. Neumann, University of Illinois, Champaign, IL USA
Susan Leigh Star, University of Illinois, Champaign, IL USA

• *Participation of heterogeneous user groups: Providing an integrated hospital information system*..... 241
Anita Krabbel, University of Hamburg, Hamburg, Germany
Ingrid Wetzel, University of Hamburg, Hamburg, Germany
Sabine Ratuski, University of Hamburg, Hamburg, Germany

Integrating user advocacy into participatory design: The designers' perspective..... 251
Peter Mambrey, German National Research Center for Information Technology,
Sankt Augustin, Germany
Gloria Mark, German National Research Center for Information Technology,
Sankt Augustin, Germany
Uta Pankoke-Babatz, German National Research Center for Information
Technology, Sankt Augustin, Germany

Conference Co-chairs Welcome Message

Welcome to the Fourth Biennial Conference on Participatory Design

Since their inception in 1990, the conferences on Participatory Design have become the principal North American gathering place for a growing international community concerned with making users' expressions of their own needs central to the development of information systems. Within the wider field of systems design, the PD conferences offer a distinctive orientation to the key issues of whose voices get heard and how they enter the design process.

We feel it important that the notion of participation be considered in the fullest possible sense. In particular, it derives from the democratic ideal that people have an influential say in making those decisions that affect them most. During a period when exercising choices in ones' life is increasingly presented as choosing from among predetermined options in a consumer marketplace, the PD conferences offer a vital, even refreshing space for keeping open a lively discussion of positive alternatives. For us, the PD ideal calls for all who would be affected by a system to be part of its creation -- from initiation through ongoing redesign in use. This requires not just construction, but also challenging conventional assumptions and practices. The very basis of our research and our practice demands critique.

This notion of participation applies of course to the conference itself. We ask that you not only listen during the next three days, but that you question. And that you join us in providing, if not answers, at least good directions for further work. We encourage you to take an active part in the rich array of scheduled events as well as the many possibilities for informal exchange. We hope that you will come away with a deeper appreciation of PD issues and stronger connections with others who share your concerns. It is through such engagement that the PD community will grow and thrive. (You may even want to help in organizing a future PDC!)

This conference has been made possible through the generosity of many people. The organizational and financial support of Computer Professionals for Social Responsibility continues to be critical. We also appreciate the financial assistance of Xerox Corporation, and we thank Apple Computer, Inc. for producing this year's proceedings. Most important are the contributions of time and energy of the numerous chairs, organizers, committee members, student volunteers, authors, and ultimately conference attendees.

Welcome to PDC'96!

David Bellin
North Carolina A&T State University

Andrew Clement
University of Toronto

PDC'96 Conference Co-chairs

Program Co-chairs Welcome Message

Welcome to PDC'96

We welcome you to PDC'96 and invite you to listen to stimulating presentations and to participate in three days of lively discussions. We hope the papers, panels, and workshops at this year's conference will provide an opportunity for you to reflect on the diverse perspectives and varied approaches represented within the participatory design community.

We received almost twice the number of papers as were submitted to PDC'94 and so we expanded the conference by a full day to accommodate the large number of quality papers that we received. We also were able to include, for the first time, a doctoral consortium. This increased interest in the PDC is encouraging and suggests that the general themes of participatory design are of continuing interest and growing importance. Some of the pioneers in participatory design are among the authors of the papers in this year's conference, and new voices and viewpoints also are represented in the program.

This year we have paper sessions dealing with local community participation in technology design, technology design and introduction in lesser developed countries, and participatory design in small organizations. As with other PD conferences papers address the relation of organized labor to technology design and implementation, and the value of re-energizing participatory design's political agendas. There also are papers that report on experiences (both successes and failures) in applying particular participatory methods, techniques and tools.

The keynote speakers for this year's conference also reflect the diversity of our community and our interest in reaching out to other disciplines for insights and support. One of our keynote speakers, Mark Nichter, is an anthropologist who has worked for a number of years developing participatory approaches to the design and delivery of health care systems and technologies in lesser developed countries. Our second keynote speaker, Elaine Bernard, is the director of the Trade Union Program at Harvard. Her work has focused on the implications of technological change for workers' jobs and employment.

This exciting program is, as always, the result of the efforts of many people. We thank the authors, members of the program committee and chairs of the various committees for dedicating their time and energy to this collective effort.

We hope the next three days will revitalize your commitment to participatory design as well as challenge you to think in new ways.

Computer Professionals for Social Responsibility

CPSR MISSION

CPSR is a public-interest alliance of computer scientists and others concerned about the impact of computer technology on society. We work to influence decisions regarding the development and use of computers because those decisions have far-reaching consequences and reflect our basic values and priorities.

As technical experts, CPSR members provide the public and policy makers with realistic assessments of the power, promise, and limitations of computer technology. As concerned citizens, we direct public attention to critical choices concerning the applications of computing and how those choices affect society.

Every project we undertake is based on five principles:

We foster and support public discussion of, and public responsibility for decisions involving the use of computers in systems critical to society.

We work to dispel popular myths about the infallibility of technological systems.

We challenge the assumption that technology alone can solve political and social problems.

We critically examine social and technical issues within the computer profession, both nationally and internationally.

We encourage the use of information technology to improve the quality of life.

CPSR is a democratically organized membership organization. Our accomplishments result from the active involvement of our members, supported by the CPSR staff and computer professionals across the country.

HISTORICAL HIGHLIGHTS

- CPSR published the first papers and held the first public debates on the computing aspects of the Strategic Defense Initiative, or "Star Wars."
- CPSR members testified before a U.S. Senate subcommittee on the feasibility of SDI.
- CPSR/Boston produced an award winning slide show and videotape called "Reliability and Risk: Computers and Nuclear War."
- CPSR members produced the first book for general audiences on the ways in which computers revolutionize modern weapons systems, *Computers in Battle: Will they Work?*

- At the request of a House subcommittee, CPSR studied the FBI's proposed National Crime Information Center upgrade (NCIC 2000). CPSR's report was widely credited for the FBI's subsequent decision to drop a proposal to track individuals who had not been charged with any crime.

- CPSR co-produced a "Special Report on Computers and Elections" for the 1988 Presidential Campaign, highlighting the potential for errors in electronic vote-counting systems.

- CPSR filed lawsuits under the Freedom of Information Act to force the FBI and Secret Service to reveal whether they monitor computer bulletin boards and electronic mail.

- CPSR/Portland hosted a conference on Computers and the Environment.

- The CPSR Workplace Project organized PDC'90 - the first U.S. conference on participatory design, in which users work together with software designers to ensure that systems meet workers' needs.

- CPSR helped lead a successful grassroots campaign to convince the Lotus Development Corporation not to release their proposed Marketplace: Households product, which would have included data on 120 million Americans.

- CPSR/Berkeley organized a media campaign to register our concern over the deadly role of computing technology in the Persian Gulf War.

CPSR PROJECTS

By sponsoring both national and local projects, CPSR serves as a catalyst for in-depth discussion and effective action in key areas:

The National Information Infrastructure

Civil Liberties and Privacy

Computers in the Workplace

Technology Policy and Human Needs

Reliability and Risk of Computer-Based Systems

In addition, CPSR's chapter-based projects and national working groups tackle issues ranging from the implementation of Calling Number ID systems to the development of nanotechnology and virtual reality, from the use of computers in education to working conditions for computer professionals, from community networks to computer ethics.

HOW TO BECOME A MEMBER

Just fill out the membership form attached as the last page of this volume, enclose a check, and mail it to CPSR, P.O. Box 717, Palo Alto, CA 94302.

MEMBERSHIP BENEFITS INCLUDE:

As a member of CPSR, you are joining a nationwide network of concerned people who are committed to bringing a public interest perspective to all aspects of information technology.

- Access to an international network of people who can provide expertise and well-researched support for progressive positions concerning information technology policy.
- Access to on-line information and discussion groups on key topics concerning the socially responsible use of information technology.
- The chance to participate in local and national work groups on issues of particular interest to you.
- A quarterly newsletter containing in-depth analysis of major issues as well as updates on CPSR activities and action alerts.
- Invitations and discounts to CPSR events and publications. CPSR sponsors conferences on Participatory Design (PDC), Directions and Implications of Advanced Computing (DIAC), and Computers, Freedom and Privacy (CFP), among others.

**Participation in Community Health Care programs:
Are we ready to move beyond rhetoric to consider methods
and the politics of the possible?**

Mark Nichter
Professor of Anthropology
University of Arizona
Tucson, Arizona
MNichter@Anthro.Arizona.edu

ABSTRACT

Participation in Community Health Care programs: Are we ready to move beyond rhetoric to consider methods and the politics of the possible? Community participation was heralded as the cornerstone of primary health care in the 1980's. Community health committees and worker programs were advocated to serve as links between the "community" and the health care infrastructure. A decade later, evaluations revealed that community health worker programs were largely a bust given the rather naive way they were implemented and the politics of local patronage systems as well as vested interests of professionals with "the system". The path of the least resistance which generally characterized program implementation, involved the community in only token gestures of participation. At present, development planners have become enamored with low cost techniques of "reading the community" such as focus groups and rapid assessment procedures which are largely replacing surveys. None of these approaches however foster active community participation. Largely unaddressed by all of them are forms of embodied knowledge and emergent behavior which are situational and influenced by sense-environment based memory.

As a participant observer in the international health field involved in mobilizing and monitoring community participation, I will discuss some of the lessons I have learned while working at both the grassroots level as well as among groups of professionals attempting to collaborate in the name of development. In my talk, I will invite a rethinking of the concept of community and encourage a reframing in terms of "action sets" (people brought together by activities), the social relations of critical thinking and skillful interaction, and what Jean Lave has termed "communities of practice". I will outline a continuum of

participation ranging from low-end compliance and securing of end-user feedback to projects (products) already in the development stage to high-end participation as an ongoing process in which resources once generated are envisioned to be appropriated, re-used and/or redesigned to fit circumstances. As a means to mobilize middle to high end participation I will advocate for 1) new opportunities for participatory research as a space/time in which "community" members are able to explore options, raise concerns and articulate needs, and 2) the development of ways of assessing "community response" to interventions (inventions) so that midcourse corrections are enabled and new course thinking is possible. I also will emphasize the need for fostering a transdisciplinary perspective to problem solving which goes beyond multi and inter disciplinary thinking and argues for paying as much attention to the social relations of performance (on the job, in the community) as the social relations of production and consumption. Finally, I will raise questions about the politics of democratic Participatory Development-Design approaches given: cultural norms in more and less hierarchical social structures, the micropolitics of professions as this effects the protection of boundaries and the distribution of capital (economic, social, symbolic, cultural), and anxiety about job security given flexible accumulation trends. Participatory design has sought to emphasize the need for including the user of systems in the full design process as equal partners. While this is an important step forward, it has not always included a full analysis of power in the workplace and society. Users need organization, not simply individual rights to participate. Real change will mean redistribution of power and that rarely takes place without an organized challenge to existing hierarchies and institutions. Designers can not be neutral on the issue of power inequality in the workplace.

In *PDC'96 Proceedings of the Participatory Design Conference*. J. Blomberg, F. Kensing, and E.A. Dykstra-Erickson (Eds.). Cambridge, MA USA, 13-15 November 1996. Computer Professionals for Social Responsibility, P.O. Box 717, Palo Alto CA 94302-0717 USA, cpsr@cpsr.org.
